

10th ISAAC Congress
- First Announcement -

Macau, August 2-8, 2015

Special Session on Recent Progress in Evolution Equations

International Society for Analysis, its Applications and Computation

Session Organizers

- Marcello D'Abicco
(m.dabdicco@gmail.com)
University of São Paulo
- Fumihiko Hirose
(hirosawa@yamaguchi-u.ac.jp)
Yamaguchi University
- Michael Reissig
(reissig@math.tu-freiberg.de)
University of Freiberg

The goal of the session is to discuss the state-of-the-art of qualitative properties of solutions of linear and non-linear evolution models.

We have in mind dispersive equations, σ -evolution equations and parabolic equations as well.

Among other things well-posedness, asymptotic profile, blow-up behavior and the influence of low regular coefficients are of interest.

We invite you to participate in sharing the latest results of your research.

We kindly ask you to provide a title and an abstract, preferable between a quarter and half page of A4.

We are looking forward to see you in Macau!

The Senado Square, Macau

Main campus, University of Macau

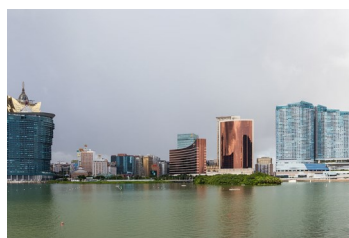

Ruins of St Paul, Macau

Travel Information

The congress will take place at the University of Macau:

<http://www.umac.mo/>

Participants are suggested to land in Hong Kong and then to take the ferry to Macau.

Lake Nam Van, Macau

Visa Issues

Macau and Hong Kong usually do not require visa for EU citizens. For visits to Mainland China, a valid visa is required.

For short stays (72 hours) in the Zhuhai economic zone, visas can also be obtained at the border control.
